

SCS-X Price

Lower support sliding frameless system

Material: Aluminum - glass
Glass type: 8/10 mm tempered
Profile color: Anodized - RAL
Hardware color and material: Metal, gray
Maximum panel width: 1200 mm
Maximum panel height: 3000 mm

Typically, the weight of glass sliding systems is quite significant, and when installing options with a supporting top profile, a ceiling is required that can withstand a large mass. Not all openings have it, and this can cause serious difficulties. With the Vizyon SCS-X lower support system, this problem disappears completely. The SCS X system has a bottom profile with a height of 23mm. It helps to prevent water from flowing into the room, snowfall, and debris from outside. The system has latches on the outer doors. Since during movement they are interdependent, after closing the latches, the entire structure becomes reliably protected from hacking. There is also a high-quality turnkey lock for closing the structure from the outside. The system uses tempered glass 8/10 mm thick, it is possible to use triplex. Any artistic processing of glass is possible - tinting, matting, facet, engraving, applying matted images, applying full-color images, color photo printing..

The assembly of sash profiles with glass is carried out by gluing with a special polyurethane adhesive for glass. In addition to high adhesion, the shape of the sash profiles is such that the cured adhesive forms a roller, making it impossible to remove (or fall out) the glass. Glue fixing eliminates the need to make holes in the glass.

Height Length	2300	2500	2700	2900
3500	2433	2513	2615	2726
